Software Engineer at Off Piste Agency (London, United Kingdom / Feb. 2017 - Today)

At Off Piste Agency we help startups to launch their projects by providing world class development processes.

- Implemented Bombinate website using agile methodologies with React, Koajs and PostgreSQL.
- Implemented TechREP MVP using React and Mapboxgl.

Software Engineer at CareLinx (San Bruno CA / Jul. 2015 - Jan. 2017)

Working as a remote software engineer from Chile with the team in San Bruno, CA. Implementing the new design of the website and migrating the existing Django application to React/Django Rest.

Main contributions include:

- Website revamp to be 100% mobile responsive, compatible webview in iOS and Android app, cross-client compatible emails
- Real time messaging system for CareLinx Users, using Firebase as the backend.
- Task list module with email alerts and push notifications on the iOS and Android apps.
- Advanced scheduling for the tasks including recurring tasks on different time spans.
- Main engineer for timesheet and invoicing systems, including smart overtime calculations, PDF generation and email alerts.
- Integration with HomeWork Solutions.
- Integration with Backgrounds Online.

Technologies: Django, Django Rest Framework, React, React Native, Firebase, PostgreSQL.

Software Engineer at LawLogix Group, Inc. (Phoenix, AZ / Apr. 2012 - Jul, 2015)

LawLogix is the leader Immigration Case Manager System.

Participated in one year J-1 exchange visitor training program in Phoenix, AZ. Successfully ported legacy code from existing LawLogix's product to Python using Django web framework.

After the J-1 period I was promoted to Senior Software Engineer, implementing test-driven development and training new developers under H1B1 visa for chilean citizens.

Working on the architectural design of a new company project, implemented a 3-tier application using Django Rest Framework and an AngularJS client, achieving 100% coverage on unit test for Python and Javascript projects.

Technologies: Django Rest Framework, Celery, PostgreSQL, AngularJS, Grunt, Karma.

Lead Development Engineer at *Foxido* (Santiago, Chile / Sep. 2011 - Feb. 2012)

Foxido was part of the Startup Chile program. It is a marketplace for local services.

As Lead Developer I designed and implemented the public facing system to allow users search for service providers and providers to list their services.

Technologies: Django, MySQL, jQuery.

Software Engineer at *Derco* (Santiago, Chile / Mar. 2011 - Jul. 2011)

Derco is a big car dealership in Chile. Working as a software engineer implementing an e-commerce system for the existing product catalogs, connecting the client software to the main SAP services.

Technologies: ASP.NET, MS SQL Server, jQuery.

Software Engineer at *AreaWeb* (Santiago, Chile / Nov. 2010 - Feb. 2011)

Designed and implemented a client software for a private financial company. The goal of this project was a user friendly interface for existing web service endpoints.

Technologies used: Django, ASP.NET, jQuery.

Software Engineer at *Quintec* (Santiago, Chile / May. 2010 - Nov. 2010)

Implemented a government birth control system project for public hospitals, using MS SQL Server and ASP.NET. Contributed with the database design and user experience design.

Software Engineer at *TIDE S.A.* (Temuco, Chile / Jun. 2007 - May. 2010)

Worked as Junior Software Engineer for a year then full time Engineer. Participated in numerous educational and commercial software projects.

Successfully delivered a Statistical Reporting System for College KPI data using PostgreSQL, Django and Fusioncharts.

Created an online catalog for educational resources with Magento and MySQL.
