Extract

More than 9 years of professional experience developing software for the web, with strong experience with Python/Django, PostgreSQL and Javascript/React.

Vast experience as remote employee, open for relocation.

Experience

Software Engineer at *CareLinx* (San Bruno, CA, August 2015 - December 2017)

Working as a remote software engineer from Chile with the team in San Bruno, CA. Implementing the new design of our website and migrating the existing Django application to React. Remarkable achievements are the creation of realtime messaging application for our customers and integrations with third party services like 'Backgrounds Online'.

Technologies: Django, Django Rest Framework, React, React Native, Firebase, PostgreSQL

Senior Software Engineer at *LawLogix* (Temuco, Chile, August 2014 – July 2015)

Participated on the architectural design of a new company project, implementing a 3-tier application using Django Rest Framework and an AngularJS client. Main achievement is 100% coverage on unit test for both Python and Javascript projects.

Technologies: Django Rest Framework, Celery, PostgreSQL, AngularJS, Grunt, Karma

Senior Software Engineer at *LawLogix* (Phoenix, AZ, February 2014 – July 2014)

Participated on the architectural design of a new company project, implementing a 3-tier application using Django Rest Framework and an AngularJS client. Main achievement is 100% coverage on unit test for both Python and Javascript projects.

Technologies: Django Rest Framework, Celery, PostgreSQL, AngularJS, Grunt, Karma

Senior Software Engineer at *LawLogix Spa Chile* (Santiago, Chile, April 2013 – January 2014)

Active member of software development team for the conversion project from legacy system to Django. Implemented test-driven development and trained new developers.

Technologies: Django, PostgreSQL, AngularJS

Software Engineer at *LawLogix* (Phoenix, AZ, April 2012 – April 2013)

Participated in one year J-1 exchange visitor training program at LawLogix in Phoenix, AZ. Successfully ported legacy code from existing LawLogix's product to Python using Django web framework.

Technologies: Django, PostgreSQL, jQuery

Lead Programmer at *Foxido* (Santiago, Chile, September 2011 – February 2012)

Designed and implemented the site for a startup company that created an online marketplace for local services.

Technologies: Django, MySQL, jQuery

Software Developer at *Derco* (Santiago, Chile, March 2011 – August 2011)

Implemented an e-commerce system for the existing product catalogs (auto parts), connecting the client system to the main SAP services.

Technologies: ASP.NET, MS SQL Server, jQuery

Software Developer at *AreaWeb* (Santiago, Chile, November 2010 – February 2011)

Created and developed one project for a private finance company. This project provides a friendly user interface for existing web services on said company.

Technologies: Django, ASP.NET, jQuery

Software Developer at *Quintec* (Santiago, Chile, June 2010 – November 2010)

Contributed in both server and client side development for a government project for birth control system on public medical hospitals.

Technologies: ASP.NET, MS SQL Server, jQuery

Software Developer at *TIDE* (Temuco, Chile, March 2008 – June 2010)

Participated in numerous educational and commercial software projects. Main achievements are statistical data reports system for a private College and online catalog for educational resources.

Technologies: Django, jQuery, FusionCharts, PHP, Magento, MySQL, Abode Flex

---

Education
