Hugo Pineda

Staff Software Engineer | Full-Stack Product Engineering

✉️ hpineda83@gmail.com | 📱 (650) 745-5280 | 💼 linkedin.com/in/hugoandres | 🐙 github.com/hugotox | 🔗 hugopineda.me | 📍 San Francisco, CA

Staff full-stack engineer with 18+ years building healthcare platforms, marketplaces, and customer-facing products in TypeScript, React, Node.js, and Python. Most recently tech lead for a patient platform serving about 60,000 monthly active patients, and builder of AI features used by 1,500 healthcare advocates.

📄 **Detailed resume:** github.com/hugotox/hugotox/blob/master/hugo-pineda.md

Skills

- **Languages:** TypeScript, JavaScript, Python, SQL
- **Frontend:** React, Next.js, TanStack Query and Router, Tailwind CSS, Vite, React Native, SvelteKit
- **Backend and data:** Node.js, NestJS, Django, REST APIs, GraphQL, PostgreSQL, Redis
- **AI and infrastructure:** Anthropic Claude API, OpenAI API, AWS, Docker, Vercel, Playwright, Cypress, Sentry, Datadog

Experience

Solace Health | Oct 2024 - Present | Remote

Staff Full-Stack Engineer | Oct 2025 - Present

- Grew monthly patient logins about 50%, to about 60,000 monthly active patients, as tech lead for a team of three that built the Patient Experience platform from scratch and shipped it in four months.

Senior Full-Stack Engineer | Oct 2024 - Oct 2025

- Shipped AI care planning and AI claim documentation used by all 1,500 advocates, built on the Anthropic API, so every claim now goes out in one standard format.
- Started the design system, 56 shadcn components published to npm and used by four apps, with every team contributing.
- Moved two apps to Vite, cutting production builds from about 2 minutes to 10 seconds, and code-split a 10 MB bundle down to a 200 KB largest chunk.
- Replaced OpenPhone with Twilio for about 6,000 calls a month, capturing the transcripts that feed claim documentation.

Zumper | Jul 2019 - Oct 2024 | San Francisco Bay Area

Staff Frontend Engineer (2023 - 2024) · **Senior Frontend Engineer** (2021 - 2023) · **Frontend Engineer** (2019 - 2021)

- Led the TypeScript migration across Zumper and PadMapper with a team of five, taking coverage from about 50% to 90% in six months.
- Started the Chakra UI design system used by three apps, and raised accessibility compliance on Zumper to over 95%.
- Fixed Core Web Vitals, taking Zumper's CLS from 0.25 to a perfect score and LCP from red to green on both sites.
- Rebuilt PadMapper.com, a site with millions of users, from AngularJS to React and Redux with server-side rendering.

CareLinx | Software Engineer | Jul 2015 - May 2019 | San Bruno, CA

- Built matching, scheduling, and real-time messaging for a marketplace of about 100,000 caregivers, using Django REST Framework, PostgreSQL, React, and Socket.IO.
- Made every page work on mobile so the site could ship as iOS and Android apps, and cut the largest JavaScript chunk from 5 MB to 200 KB.

LawLogix Group | Software Engineer | Apr 2012 - Jul 2015 | Phoenix, AZ

- Migrated the legacy 4D application to Python and Django, and introduced test-driven development to the team.

Earlier career | 2007 - 2012 | Chile

- Built e-commerce, public hospital, and education software as a software engineer at Derco, AreaWeb, Quintec, and TIDE S.A.

Side project

StickMonkey | Jan 2024 - Oct 2024 (side project, alongside full-time roles). Technical co-founder of a marketplace for student pilots. Built the whole product in SvelteKit and Supabase and reached 10,000 registered users.

Education

B.S. Industrial Engineering (Computer Science Track) | Universidad de La Frontera | Temuco, Chile | 2008
